UNIVERSITY PRESS

Great Clarendon Street, Oxford ox2 6DP

Oxford University Press is a department of the University of Oxford.
It furthers the University's objective of excellence in research, scholarship,
and education by publishing worldwide in

Oxford New York

Auckland Cape Town Dar es Salaam Hong Kong Karachi
Kuala Lumpur Madrid Melbourne Mexico City Nairobi
New Delhi Shanghai Taipei Toronto

With offices in

Argentina Austria Brazil Chile Czech Republic France Greece
Guatemala Hungary Italy Japan Poland Portugal Singapore
South Korea Switzerland Thailand Turkey Ukraine Vietnam

Oxford is a registered trade mark of Oxford University Press
in the UK and in certain other countries

- current retirees 72, 85, 86, 87, 132
 - characteristics of 73–4
 - economic well-being 75–81
 - preretirement living standards 113
 - replacement rates 81, 84
- Currie, J. 95
- DB (defined benefit) plans 85, 120, 179, 180, 181, 184, 193, 199, 213, 234, 237, 239, 240, 241, 299, 303
 - 401(k) participants with 186
 - annuitized income 192, 238, 242, 243
 - background risk 183
 - benefits 77
 - changes in the prevalence of 43
 - coverage plummeting for young workers 181
 - currently received and expected 45
 - declining role of pension benefits 79
 - defined payout at retirement 182
 - EBBs less likely to participate in 28
 - effects of tenure in 203
 - employer shift to DC 271
 - erosion of 71
 - falling importance of 86
 - future income flows from 241
 - income from 119
 - increased prevalence and use of 124
 - likelihood of stock market investment 202
 - long-term shift from 7
 - lower levels of 301
 - nonlinearities in entitlements 242
 - people richer than those with 196
 - primary 15
 - risks and opportunities 183, 187, 189, 203–4
 - safe 185
 - spouse income 77
 - uncertainty regarding future of 5
 - underfunding of 190
- DC (defined contribution) plans 7, 8, 77, 85, 120, 179, 180, 181–2, 189, 193, 197, 235, 237, 238, 239, 240, 241, 242
 - account balances of 119
 - background risk 183
 - balance at quit date 215
 - contributions defined frequently as
 - percentage of pay 218
 - coverage risen 15
 - effects of tenure in 203
 - emergence of 71
 - employer shift from DB to 271
 - endogenous sorting or immediate learning effect from 199
 - equity held outside of pensions 186
 - estimates based on administrative earnings data 224–8
 - estimates of wealth 218
 - expected present value of wealth 218
 - important role that voluntary saving plays in 221
 - investment choices 184, 191
 - methodology for generating pension wealth for participants 212–14
 - modeling strategy for calculating wealth 213
 - national 248
 - people richer than those with 196
 - quit date balances 224
 - researchers' ability to model 211–12
 - respondent-reported wealth 213
 - risks and opportunities 185, 187, 188
 - stock market investment 160, 187–8, 199, 202, 248
 - thrift or savings 213
 - unannuitized lump-sum payouts 192
 - uncertainties tied to growth in financial assets of 43
 - value of all pension accounts 45
 - voluntary participation 189
- death:
 - average age of 127
 - family 301
 - leading but preventable cause of 145
 - spouse 166
- debt:
 - uninsured individuals 169
 - unsecured 120

- decision-making:
 - financial 179
 - risky choices 266
- Delorme, L. 43
- demographic characteristics 14, 28, 31, 281
 - cross-cohort comparison of 15
 - investors 257
 - salient historic trends likely to influence 70
- demographic variables 27, 149, 192, 286
- demographics 120
 - adjusting for expected changes 72
 - comparing composition of cohorts 272
 - differences across groups 115
 - documented trends 144
 - individual status 253
 - investor 252
 - lifetime 70
 - wealth varies across groups 272
- dependent variables 28, 61
- depression 106
- DI (disability insurance) programs 72, 96, 118
 - receipt of 126–7, 130, 132
- diabetes 6, 103, 106, 141
 - treatments for 108
- Dickemper, J. 278
- disability 6, 10, 101
 - association between obesity and 115
 - job left because of 204
 - measuring 115
 - more severe definition of 99
 - objective 100
 - rates increasing 127
 - reported 115
 - work 96
- disadvantaged groups 55
- discount rate 47
 - nominal 46
- disease:
 - chronic 108, 141, 152
 - people survive longer with 115
 - respiratory 141
- divorce 58, 71, 74, 86, 166, 281, 303
 - Boomers have higher percentages of 120
 - higher probability of men remarrying 144
 - replacement rates 84
- drinking 6, 141
 - heavy 154
- drinking problems 10, 144, 155
 - persons who acknowledge 152
 - screening for 144–5
- DYNASIM model 114
- early retirement 13, 44, 301
 - increasing trend in 18
 - Social Security age 25–6
 - transitions 18
- earnings 81
 - accrued 221
