Contributors

B. Douglas Bernheim is Lewis and Virginia Eaton Professor of Economics at Stanford University and a Research Associate of the NBER. His research examines taxation and fiscal policy, the determinants of saving, insurance issues, and topics in mathematical economics. He received the PhD in economics from MIT.

David Blake is Professor of Financial Economics and Director of the Pensions Institute at Birkbeck College in the University of London and Chairman of Square Mile Consultants. His research interests include the modeling of asset demand and financial innovations, pension fund investment behavior and performance, and pension plan design. He received the PhD at the London School of Economics.

Zvi Bodie is Professor of Finance at Boston University School of Management; he also serves on the Pension Research Council Advisory Board and is a member of the Financial Accounting Standards Board Task Force on Interest Methods. Previously he visited Harvard's School of Business Administration and served on the finance faculty at MIT's Sloan School of Management. His research interests include investment, portfolio choice, and finance. He received the PhD in economics from the Massachusetts Institute of Technology.

Jeffrey R. Brown is Assistant Professor of Public Policy at Harvard's Kennedy School of Government, and a Faculty Research Fellow at the NBER. His research examines the role of insurance, including public and private pensions, annuities, and life insurance products, in helping secure retirement income. He received the PhD in economics from MIT.

William Burrows is Director of Business Development at Prudential Annuities in London.

Andrew Caplin is Professor of Economics at New York University. He previously taught at Columbia University. His research focuses on macroeconomic and microeconomic theory and residential real estate markets. He received the PhD in economics from Yale University.

Robert L. Clark is Professor of Economics and Business at North Carolina State University. Previously he was a Visiting Professor at the Fuqua School of Business, Duke University. His research focuses on retirement and pension policies, economic responses to population aging, wellbeing of the elderly, and international pension issues. He received the PhD degree in economics from Duke University.

Steven Davis is Professor of Economics at the University of Chicago, a Research Associate with the NBER, and a Principal at Chicago Partners. His research interests include labor markets, risk-sharing, consumption behavior, and business cycles. He previously held positions at MIT, the University of Maryland, the Hoover Institution at Stanford, and the Chicago Federal Reserve Bank. He received the PhD in economics from Brown University.

J. Benson Durham is a Research Officer in the Finance and Trade Policy Research Centre at the University of Oxford. His research examines stock market anomalies, the macroeconomic effects of international capital flows, and economic growth. Previously Dr. Durham worked at TIAA-CREF. He received the PhD from Columbia University.

Lorenzo Forni is an economist in the Research Department of the Bank of Italy in Rome. His research interests include the determinants of household financial security. He is completing his PhD in economics at Boston University.

Jagadeesh Gokhale is an economist at the Federal Reserve Bank of Cleveland. His research focuses on the impact of U.S. fiscal policy on the economy, particularly on social security and Medicare, saving and intergenerational transfers, and wealth inequality. He received the PhD in economics from Boston University.

P. Brett Hammond is Manager of Corporate Projects at TIAA-CREF, and he also serves on the Pension Research Council Advisory Board. His research focuses on higher education and pensions, science and technology, finance and health policy. Dr. Hammond previously worked at the National Academy of Science. He received the PhD in public policy from MIT.

Michael Heller is Vice President of the Actuarial Pension Services division of TIAA-CREF, where he focuses on retirement plan design and funding issues. He is a Fellow of the Society of Actuaries and is an Enrolled Actuary. He received the BS in mathematics from the City College of New York.

Laurence J. Kotlikoff is Professor of Economics at Boston University, Research Associate at the NBER, and President of Economic Security Planning, Inc. His research interests include generational accounting and saving, macroeconomics and tax issues, and insurance. He previously taught at UCLA and Yale University. He received the PhD in economics from Harvard University.

Martin L. Leibowitz is Vice Chairman and Chief Investment Officer of

TIAA-CREF, and serves on the Boards of Trustees for the Institute for Advanced Study at Princeton, Carnegie Corporation, University of Chicago, and AIMR (Association for Investment Management Research). Previously he worked with Salomon Brothers, Inc. as the Managing Director in charge of both domestic and international fixed income and equity research. He received the MS in mathematics from the University of Chicago and the PhD in mathematics from the Courant Institute of New York University.

Philip B. Levine is Associate Professor of Economics at Wellesley College. His research interests focus on policy-relevant topics including unemployment insurance, welfare policy, and the effects of demographic change in labor markets. He is a faculty research fellow at the National Bureau of Economic Research. He has served as a senior economist at the White House Council of Economic Advisers on issues relating to the labor market, education, and welfare policy. He received the BS from Cornell University and the PhD from Princeton University.

Olivia S. Mitchell is International Foundation of Employee Benefits Professor of Insurance and Risk Management, and Executive Director of the Pension Research Council at the Wharton School of the University of Pennsylvania. She is also a Research Associate at the NBER and she serves on the Steering Committee for the Health and Retirement Survey for the University of Michigan. Her research focuses on private and social insurance, employee benefits, and pension reform in the U.S. and overseas. She previously taught at Cornell University, and she has visited Harvard University and the University of New South Wales in Sydney, Australia. She received the PhD in economics from the University of Wisconsin-Madison.

Christopher M. Murtagh is Associate Director of the Center for Home Care Policy and Research at the Visiting Nurse Service of New York. His research interests include state financing and delivery systems for home and community based services, and transitions between post-acute and long-term-care settings. Previously he worked with the AHCPR where he studied lifetime nursing home use and private long-term-care insurance underwriting. He received the PhD in chronic disease epidemiology from Yale University.

J. Michael Orszag is a Lecturer in Economics at Birkbeck College in the University of London. His research interests include pension asset-liability modeling, life insurance, and e-commerce. He received the PhD in economics from the University of Michigan.

John W. R. Phillips is an economist at the Social Security Administration. Previously he was a Postdoctoral Fellow at the Population Studies Center, University of Pennsylvania and taught at Syracuse University. His research interests include labor economics and public finance. He received the BA and PhD in economics from Syracuse University.

James Poterba is Mitsui Professor of Economics at MIT and Director of the Public Economics Program at the NBER. His research interests focus on public economics and particularly tax policy. He received the PhD in economics from Oxford University.

Sylvester J. Schieber is Director of Watson Wyatt Worldwide's Research and Information Center where he specializes in the analysis of public and private retirement policy and health policy issues; he also sits on the Social Security Advisory Board and the Advisory Board of the Pension Research Council. Previously he served as Research Director of the Employee Benefit Research Institute, Deputy Director of the Office of Policy Analysis at the Social Security Administration, and Deputy Research Director for the Universal Social Security Coverage Study at the Department of Health and Human Services. He received the PhD in economics from the University of Notre Dame.

Jason Scott is Director of Financial Research at Financial Engines Inc. where he model mutual fund and stock returns. His interests in pension economics include 401(k) tax benefits, the determinants of defined contribution employee participation, and the impact of pension plan lump sum distribution options on retirement income. Previously he worked as a litigation consultant on securities and valuation cases at Cornerstone Research. He received the PhD in economics from Stanford University.

Brenda C. Spillman is a Senior Research Associate at the Urban Institute. Her research interests include disability and long-term care use and financing, including nursing home and home care use, informal caregiving, and Medicare cost projections. Previously she was a researcher at the AHCPH. She received the PhD at Syracuse University's Maxwell School.

P.S. Srinivas is a Financial Economist in the Latin America & Caribbean Region of the World Bank in Washington, D.C. He works in the areas of capital markets, pensions, corporate finance, and investments. Previously he worked at the Asian Development Bank in Manila, Philippines in the areas of capital markets and project finance. He received the PhD in economics from Cornell University.

Steven F. Venti is Professor of Economics at Dartmouth College and a Faculty Research Associate at the NBER. His research examines the links between tax policy and saving, the effectiveness of saving incentives, housing policy, and the process of wealth accumulation. He received the PhD in economics from Harvard University.

Mark Warshawsky is Director of Research at the TIAA-CREF Institute where he directs work on investment and retirement behavior, and policy on pensions, insurance, investment products, corporate governance, and the financing of higher education. His research interests include pension and retiree health plans, annuities, corporate finance, and securities markets. Previously he worked at the IRS and the Federal Reserve Board. He received the PhD in economics from Harvard University.

Paul Willen is Assistant Professor of Economics at the University of Chicago Graduate School of Business. His research examines investments, market completeness, and financial innovation. He received the PhD in economics from Yale University.

David Wise is John F. Stambaugh Professor of Political Economy at Harvard's Kennedy School. He is also the Director of the NBER Program on Aging. His research examines social security and retirement patterns around the world, 401(k) plans and retirement wealth accumulation, and population aging. He received the PhD in economics at the University of California, Berkeley.

Juan Yermo works at the Financial Affairs Division of the Organization for Economic Cooperation and Development (OECD). His research focuses on contractual savings and pension fund management. Previously Mr. Yermo was a consultant for the World Bank where he participated in numerous global pension reform projects. He received the MA in economics from Cambridge University and the MPhil in economics from Oxford University.

Stephen P. Zeldes is Benjamin Rosen Professor of Economics and Finance at Columbia University's Graduate School of Business; he is also a Research Associate with the National Bureau of Economic Research, and an Advisory Board Member of the Pension Research Council. In his research Professor Zeldes examines applied macroeconomic topics including social security reform, the determinants of household saving and portfolio choice, the effects of government budget deficits, and the relationship between consumer spending and the stock market. Previously he taught finance at the Wharton School of the University of Pennsylvania; he also served on the Technical Panel on Trends and Issues in Retirement Saving for the 1994–96 Advisory Council on Social Security and the National Academy of Social Insurance Panel on Social Security Privatization. He received the PhD in economics from MIT.

The Pension Research Council

The Pension Research Council of the Wharton School at the University of Pennsylvania is an organization committed to generating debate on key policy issues affecting pensions and other employee benefits. The Council sponsors interdisciplinary research on the entire range of private and social retirement security and related benefit plans in the United States and around the world. It seeks to broaden understanding of these complex arrangements through basic research into their economic, social, legal, actuarial, and financial foundations. Members of the Advisory Board of the Council, appointed by the Dean of the Wharton School, are leaders in the employee benefits field, and they recognize the essential role of social security and other public sector income maintenance programs while sharing a desire to strengthen private sector approaches to economic security.

Executive Director

Olivia S. Mitchell, *International Foundation of Employee Benefit Plans Professor*, Department of Insurance and Risk Management, The Wharton School, University of Pennsylvania, Philadelphia.
