Conclusions

• Mutual fund investors seek professional financial advice for a variety of reasons going much beyond the selection and purchase of specific mutual funds.

• About half of mutual fund–owning households in May 2011 reported that they have ongoing financial advisory relationships.

• The advisory relationship is complex and involves a range of give and take in the decisionmaking process.

• Although a wide range of mutual fund investors uses professional financial advisers, certain investors are more likely to work with advisers than others.
