The 2017 PRC Symposium on Revisiting Saving and Retirement in a Record Low Return Environment will explore how weak expected future performance of capital markets in the next decade will shape pension saving, investment, and retirement decumulation plans. Academics, policymakers, and industry leaders will debate alternative strategies to cope with these challenges globally, as economic growth remains slow and low returns become the ‘new normal.’ Conference participants will include plan sponsors, benefits specialists, actuaries, academics, regulators, and others working to design resilient pensions for the next decades.

By the end of the next decade, the number of older Americans will have grown rapidly but half of the elderly - if not more - will suffer from cognitive deficits after the age of 80. The 2016 Pension Research Council symposium explored how financial decision-making changes at older ages, how and when financial advice can be useful for the older population, and what solutions and opportunities are needed to resolve the likely problems that will arise.

The conference generated energetic discussion on ways to address future pension risk management and financial system responsiveness to cognitive aging. Conference presentations and videos are available at http://www.pensionresearchcouncil.org/conferences/conf-2016.php.

Upcoming Events:
- October 13, 2016: Annual Membership Dinner
- October 14, 2016: PRC Fall Board Meeting
Retirement System Risk Management. Eds. Olivia S. Mitchell, Raimond Maurer, and J. Michael Orszag. In the wake of the worst financial crisis since the Great Depression, lawmakers and regulators are rewriting the playbook for how banks and other financial institutions must manage their risks and report their activities. This volume assesses how global responses to the financial crisis are potentially altering how insurers, pension plan sponsors, and policymakers will manage risk in the decades to come. It also examines developments in retirement saving and retirement products, to determine which and how these might help meet shortfalls in retirement provision. ISBN 978-0-19-878737-2.

Recreating Sustainable Retirement. Eds. Raimond Maurer, Olivia S. Mitchell, and P. Brett Hammond. The financial crisis and the ensuing Great Recession alerted those seeking to protect old-age security about extreme risks confronting the financial and political institutions comprising our retirement system. We explore new ways to think about, manage, and finance longevity risk, capital market risk, model risk, and regulatory risk. In-depth analyses are offered on the ‘black swans’ threatening pensions around the world, including capital market shocks, surprises to longevity, regulatory/political risk, and errors in modelling. ISBN 978-0-19-871924-3.

The Market for Retirement Financial Advice. Eds. Olivia S. Mitchell and Kent Smetters. The landscape for financial advice is changing all over the world, with new rules and regulations transforming the financial advice profession. This volume explores the market for retirement financial advice; seeks to explain what financial advisors do; and discusses how to measure performance and impact. Contributors illuminate market and regulatory challenges so as to enhance consumer, plan sponsor, and regulator decisions. ISBN 978-0-19-968377-2.
