## **Wharton School's Pension Research Council Welcomes Guideline as Associate Level Member**

The [Pension Research Council](#) at the Wharton School of the University of Pennsylvania is pleased to announce that [Guideline Technologies](#) has joined the Council as an Associate Level Member of the Council for 2018. Guideline first joined the PRC this year.

Jeff Rosenberger, Chief Operating Officer at Guideline said, "The Pension Research Council of the Wharton School has made significant contributions to understanding how people worldwide prepare for retirement, and we are delighted to support this effort. We look forward to working with our academic and business partners to advance research, explore policy issues, and develop innovative approaches to retirement in the United States and abroad."

[Olivia S. Mitchell](#), Professor of Insurance/Risk Management and Applied Economics/Policy, and Executive Director of the Wharton's Pension Research Council at the University of Pennsylvania, said: "The Council is delighted to foster a close research relationship with Guideline. We look forward to building new knowledge together on global retirement security."

**Guideline** is the only 401(k) provider with a participant fee-free, full-stack 401(k) offering that automates plan administration and compliance with a platform that directly integrates with many of the most popular payroll providers. By building transparent and first-of-its-kind software, Guideline is combatting what's unfortunately become the retirement industry status quo -- legacy providers have put profit over the interests of employees, abandoning the goal of the programs in the first place: to give employees the opportunity to save as much as possible for retirement.

**The Pension Research Council at the Wharton School** is committed to generating debate on key policy issues affecting pensions and other employee benefits. We sponsor interdisciplinary research on the entire range of private pension and social security programs, as well as related benefit plans in the United States and around the world. Download working papers and more at [www.pensionresearchcouncil.org](http://www.pensionresearchcouncil.org).

### **The Wharton School of the University of Pennsylvania**

Founded in 1881 as the first collegiate business school, the Wharton School of the University of Pennsylvania is recognized globally for intellectual leadership and ongoing innovation across every major discipline of business education. With a broad global community and one of the most published business school faculties, Wharton creates economic and social value around the world. The School has 5,000 undergraduate, MBA, executive MBA, and doctoral students; more than 9,000 participants in executive education programs annually and a powerful alumni network of 92,000 graduates.
