

**Real-World Shocks and Retirement System Resiliency**

Co-organized by Olivia S. Mitchell, John Sabelhaus, and Stephen Utkus  
April 28-29, 2022

**Sudipto Banerjee** is a senior manager in the Retirement Thought Leadership Group at T. Rowe Price. He is also a vice president of T. Rowe Price Associates. Previously, he was a research associate at the Employee Benefit Research Institute in Washington DC. In 2015, Next Avenue named him one of the "50 Influencers in Aging" for his analysis of the economic aspects of retirement. He earned a BS in economics from Presidency College, India, an MS in economics from the Indian Statistical Institute, and a PhD in economics from Ohio State University.

**Peter J. Brady** is a Senior Economic Adviser at the Investment Company Institute where he focuses on pensions, retirement savings, and the taxation of capital income. His current research uses administrative tax data to measure changes in income across the life cycle. Previously he studied retirement adequacy, replacement rates, pension coverage, and the tax treatment of retirement savings. Prior to joining the Institute, he worked in the Office of Tax Analysis at the US Department of Treasury and as a staff economist in the Research Division at the Federal Reserve Board. Brady is a past President of the National Tax Association and a member of the SOI Consultants Panel (for the IRS Statistics of Income Division). Brady is a graduate of St. Lawrence University and holds a PhD in economics from the University of Wisconsin.

**Courtney Coile** is Professor of Economics at Wellesley College; she is also a NBER Research Associate where she co-directs the NBER Retirement and Disability Research Center and the International Social Security project. She is also a member of the Committee on Population at the National Academy of Sciences and of the Data Monitoring Committee of the Health and Retirement Study. Her research focuses on the economics of aging and health, with a focus on retirement decisions, health trends, and public programs used by older and disabled populations. She earned her PhD in economics from MIT and her AB from Harvard University.

**Elena Derby** is an economist at the United States Congressional Joint Committee on Taxation where her research focuses on retirement savings behavior and low-income housing, automatic enrollment in retirement plans, and the long-run effects of living in tax-subsidized housing. She earned her MA and PhD in economics from Georgetown University; her MA in international conflict studies at the School of Science and Public Policy, King's College London; and her BA in economics/international relations at the Claremont McKenna College.

**Lisa Dettling** is a principal economist in the Division of Research and Statistics at the Federal Reserve Board, where she forecasts economic effects of fiscal policy. Her academic research focuses on issues in household finance, especially how public policies affect family finances. Previously, she served on the team tasked with administering and disseminating the Survey of

Consumer Finances. She earned her PhD in economics from the University of Maryland, and her BS in mathematics and economics from The Ohio State University.

**Karen Dynan** is a Professor of the Practice in the Harvard University Department of Economics and at the Harvard Kennedy School; she is also a senior fellow at the Peterson Institute for International Economics. Her current research focuses on fiscal and other types of macroeconomic policy, consumer behavior, and household finances. She previously served as Assistant Secretary for Economic Policy and Chief Economist at the US Department of the Treasury, and before that she was vice president and co-director of the Economic Studies program at the Brookings Institution. She also worked for the Federal Reserve Board, leading work in macroeconomic forecasting, household finances, and the Fed's response to the financial crisis, and she served as a senior economist at the White House Council of Economic Advisers and as a visiting assistant professor at Johns Hopkins University. Dynan received her PhD in economics from Harvard University and her AB from Brown University.

**Glenn Follette** oversees the group of economists that examines the effects of fiscal policy actions on the economy and produces and presents the staff's economic outlook to the Federal Reserve Board. His research interests include the macroeconomic effects of fiscal policy actions, the effects of the economy on government budgets, and health economics. Previously, he advised the Federal Reserve Board Governor Jerome Powell on macroeconomic issues. He received his PhD from Georgetown University, and his BSE from the University of Connecticut.

**Lucas Goodman** is an economist at the US Department of the Treasury, Office of Tax Analysis. His research interests include the tax-advantaged retirement system, and how firms respond to changes in tax incentives for investment and other activities. Previously he worked at the United States Congressional Joint Committee on Taxation. He obtained his PhD in economics from the University of Maryland, and his BS in economics and mathematics from MIT.

**Sarena Goodman** is a principal economist in the Division of Research and Statistics at the Federal Reserve Board, where she administers and disseminates the Survey of Consumer Finances. Her research covers labor economics and household finance, with an emphasis on the identification of causal pathways that give rise to inequality and intergenerational mobility. Previously, she worked on the team that monitored developments in consumer lending, and she also served as a staff economist and research assistant at the White House Council of Economic Advisers. She earned her PhD in economics from Columbia University, and her AB in economics from Dartmouth College.

**Richard Johnson** is a senior fellow at the Urban Institute where he directs the Program on Retirement Policy. His research focuses on health and income security at older ages, older Americans' employment, retirement preparedness, Social Security reform, retirement decisions, and occupational change at older ages. He received his PhD in economics from the University of Pennsylvania, and his BA in economics from Princeton.

**David Knox** is a Senior Partner at Mercer and Senior Actuary for Australia. Previously he was the Foundation Professor of Actuarial Studies at the University of Melbourne; he is also lead author of the Mercer CFA Institute Global Pension Index, now in its 12th year. He qualified as a Fellow of the Institute of Actuaries (UK) and earned his PhD from Macquarie University, Sydney.

**Kathleen Mackie** is a senior economist at the United States Congressional Joint Committee on Taxation where her research interests focus on retirement savings. Previously she worked at the Office of Tax Analysis at the US Department of Treasury. She earned her PhD in economics from the University of Kentucky.

**Nicole Maestas** is an Associate Professor of Health Care Policy at Harvard Medical School and a Research Associate of the National Bureau of Economic Research where she directs the NBER's Retirement and Disability Research Center. She studies the economics of disability insurance, labor markets, health care systems, and population aging, as well as labor supply and the use of medical care. She is also investigating the causes of the opioid epidemic and its impact on employment and participation in the federal disability programs, as well as the effects of state Medicaid policies on the health care and well-being of people receiving Supplemental Security Income benefits. She received her MPP in public policy from the Goldman School of Public Policy, and her PhD in economics, both from UC Berkeley.

**Ulrike Malmendier** is the Edward J. and Mollie Arnold Professor of Finance at the Haas School of Business and Professor of Economics in the Department of Economics of the University of California, Research Associate at NBER, a faculty research fellow at IZA, a CESifo affiliate, and a CEPR research affiliate. Previously she taught at Stanford University and was a Visiting Scholar at the Max-Planck Institute in Bonn, Visiting Fellow at Princeton University, and Visiting Assistant Professor of Finance at the Graduate School of Business at the University of Chicago. She received the PhD in business economics from Harvard University and a PhD in law (summa cum laude) from the University of Bonn.

**Erika McEntarfer** is the lead economist for the US Census Bureau's Longitudinal Employer-Household Dynamics data program. Her research uses US linked employer-employee data to examine the business cycle dynamics of labor markets, worker mobility, and wage stickiness. She has an undergraduate degree from Bard College and a PhD in economics from Virginia Tech.

**Olivia S. Mitchell** is the International Foundation of Employee Benefit Plans Professor; Professor of Insurance/Risk Management and Business Economics/Policy; Executive Director of the Pension Research Council; and Director of the Boettner Center on Pensions and Retirement Research; all at the Wharton School of the University of Pennsylvania. Her research focuses on pensions, risk management, financial literacy, household finance, and public finance. She is also Research Associate at the NBER; Independent Director on the Allspring Mutual Fund Boards; Co-Investigator for the HRS at the University of Michigan; and Executive Board member for the Michigan Retirement Research Center. She received the MA and PhD degrees in economics from the University of Wisconsin-Madison, and the BA in economics from Harvard University.

**Robert Moffitt** is the Krieger-Eisenhower Professor of Economics at Johns Hopkins University, where his research focuses on the economics of the labor market, the family, and welfare systems for the poor. He has also studied statistical, econometric, and methodological issues in economics. He is a Fellow of the Econometric Society, a Fellow of the Society of Labor Economists, a National Associate of the National Academy of Sciences, a recipient of a MERIT Award from the National Institutes of Health, and a recipient of a Guggenheim Fellowship. He also is a past President of the Population Association of America, and past President of the Society of Labor Economists. He received the BA in economics from Rice University, and the MA and PhD in economics from Brown University.

**Jacob Mortenson** is an economist at the United States Congressional Joint Committee on Taxation, US House of Representatives, where he researches retirement economics, individual and corporate responses to income taxation, and measurement of income inequality. He received his PhD and MA in economics from Georgetown University, and the BA in economics and political science from the University of South Dakota.

**Kathleen Mullen** is a senior economist at the RAND Corporation and director of the RAND Center for Disability Research; she also directs the RAND Postdoctoral Training Program in the Study of Aging and the annual RAND Summer Institute Workshop on Aging. Her work addresses the economics of disability, health, and retirement, with an emphasis on intersections with social insurance programs such as Social Security and Social Security Disability Insurance. She earned her PhD in economics from the University of Chicago and her BA in economics from the University of Virginia.

**Sarah Reber** is a Lead Financial Analyst in Microeconomic Surveys Section at the Federal Reserve Board. She works on production of the Survey of Consumer Finances and focuses on survey methodology and household finance. She received her MS in applied economics from Johns Hopkins University and her BA in economics from the University of Maryland.

**John Sabelhaus** is a Non-Resident Senior Fellow at the Brookings Institution in Washington DC and Adjunct Research Professor at the University of Michigan. Previously he was a Visiting Scholar at the Washington Center for Equitable Growth and served as Assistant Director in the Division of Research and Statistics at the Board of Governors of the Federal Reserve System. There he oversaw the Microeconomic Surveys and Household and Business Spending sections, including primary responsibility for the Survey of Consumer Finances. He also was a Senior Economist at the Investment Company Institute and Chief of Long Term Modeling at the Congressional Budget Office, where he oversaw the development of an integrated micro/macro model of Social Security and Medicare. He received his PhD, MA, and BA in economics from the University of Maryland.

**Louise Sheiner** is the Robert S. Kerr Senior Fellow in Economic Studies and policy director for the Hutchins Center on Fiscal and Monetary Policy. Her research topics include issues related to health spending, federal and state and local fiscal policy, productivity measurement, and the effects of COVID-19 on the macroeconomy. Previously she served as an economist with the Board of

Governors of the Federal Reserve System, most recently as senior economist in the Fiscal Analysis Section for the Research and Statistics Division; she was also deputy assistant secretary for economic policy at the US Department of the Treasury, and as senior staff economist for the Council of Economic Advisers. Before joining the Fed, Sheiner was an economist at the Joint Committee on Taxation. She received her PhD in economics and her BA in biology from Harvard University.

**Karen Smith** is a Senior Fellow in the Income and Benefits Policy Center at the Urban Institute, where her work focuses on economic microsimulation models for evaluating Social Security, pensions, taxation, wealth and savings, labor supply, charitable giving, health expenditure, student aid, and welfare reform. She writes on demographic and economic trends, and their implications for the retirement well-being of current and future cohorts. She has a dual degree in economics and computer science from the University of Michigan.

**Stephen P. Utkus** previously worked as an officer and researcher at Vanguard, where he directed retirement security and investor behavior research teams. He is currently a visiting scholar at the University of Pennsylvania and Georgetown University. He received a bachelor's degree from MIT and an MBA from the Wharton School of the University of Pennsylvania.

**Alice Henriques Volz** is a principal economist at the Federal Reserve Board, where she works in the Microeconomic Surveys section which oversees the Survey of Consumer Finances. Her research interests focus on inequality and retirement, retirement preparation across cohorts, and the wealth distribution, and measuring and understanding trends in wealth and income inequality. She earned her PhD in economics at Columbia University and a BA from the University of California at Berkeley.

**Chris Wheat** is the Co-President for the JPMorgan Chase Institute. Previously, he served as the Director of Analytics at a financial technology startup, where he led the development of advanced analytics algorithms. He previously was an Assistant Professor at the MIT Sloan School of Management and at the Center for Urban Entrepreneurship and Economic Development at Rutgers Business School, where his research focused on strategy, entrepreneurship, global microfinance, economic sociology, and social network analysis. Wheat earned a BSE in mechanical and aerospace engineering from Princeton University, an MS in computer science from Stanford University, an MA in sociology from Harvard University, and a PhD in organizational behavior from Harvard University.

**Debra Whitman** is an economist and expert on aging issues. As Chief Public Policy Officer for AARP, she and her teams develop global policy and research insights and solutions that help communities, lawmakers, and the private sector improve our lives as we age. Previously, Whitman worked as staff director for the US Senate Special Committee on Aging to increase retirement security, lower the cost of health care, protect vulnerable seniors, safeguard consumers, make the pharmaceutical industry more transparent, and improve our nation's long term care system. She obtained her PhD in economics from Syracuse University.

**Haiyi Zhang** is currently a Master of Finance student at MIT Sloan School of Management. She was a research assistant at Wellesley College and MIT. She received her BA in economics and mathematics from Wellesley College in 2021.

**James P. Ziliak** holds the Carol Martin Gatton Endowed Chair in Microeconomics and University Research Professor in the Department of Economics at the University of Kentucky, where he serves as Department Chair and is also the Founding Director of the Center for Poverty Research. His research focuses on labor economics, poverty, food insecurity, and tax and transfer policy. Previously he was Founding Executive Director of the Kentucky Federal Statistical Research Data Center, and he taught economics at the University of Oregon. He currently chairs the National Academies of Sciences CNSTAT Study on Panel on Evaluation and Improvements to the Supplemental Poverty Measure, and previously he chaired the Board of Overseers of the Panel Study of Income Dynamics. Ziliak received his BS degree in economics and in sociology from Purdue University, and his PhD in economics from Indiana University.
